How MyWirelessTV Works

MyWirelessTV allows you to place an HDTV anywhere in your home because it transmits your video and audio wirelessly.

Make sure you identify which "source device" that you want to connect to the Transmitter. Video from the "source device" will be transmitted to your receiver ( Koreans).

INSTALLATION for the MyWirelessTV in EASY Setup units come pre-programmed to work with each other. All you need to do is connect the cables according to the diagrams below. Follow the detailed step by step instructions.

Note: Only pre-programmed models included. Refer to Owner’s Manual 5954/246/1

1. Get one power supply from MyWirelessTV Kit. Plug the smaller end of the power supply into the SVCD port on the back of the Transmitter.

2. Plug the larger end of the power supply into a power outlet.

3. Get an HDMI cable from MyWirelessTV Kit. Plug one end of the HDMI cable into the HDMI input port on the back of the Transmitter.

4. Plug the other end into the HDMI port on the Source Device from Step 2.

5. Get the second power supply from MyWirelessTV Kit. Go to the HDTV that you want to connect.

6. Plug the smaller end of the power supply into the SVCD port on the back of the Receiver.

7. Plug the larger end of the power supply into a power outlet.

8. Make sure the Power Light on the Receiver is SOLID GREEN.

If you are using the Transmitter and Receiver in the same room, please stop at step 2. If you are using the Transmitter and Receiver in different rooms, please stop at step 6.

Follow the steps below to complete the connection.

Note: The Transmitters have a separate remote control.

1. Make sure the Power Light on the Transmitter is SOLID GREEN.

2. Unplug the HDMI cable from the back of the Source Device (i.e., cable satellite, set top box, Blu-ray player, etc.) Plug the Transmitter and Receiver into the HDMI Out to TV port on the back of the Transmitter. Please note this step is optional. You are not required to use the HDMI to TV port on the Transmitter.

3. Plug the other end into the HDMI port on the Source Device from Step 2.

4. Get the second power supply from MyWirelessTV Kit. Go to the HDTV that you want to connect.

5. Plug the smaller end of the power supply into the SVCD port on the back of the Receiver.

6. Plug the larger end of the power supply into a power outlet.

7. Make sure the Power Light on the Receiver is SOLID GREEN.

Note: If you are using the Transmitter and Receiver in different rooms, please stop at step 6.

5. Plug one end of the HDMI cable into an HDMI port on the HDTV.

6. Plug the other end of the HDMI cable into the HDMI Out to TV port on the back of the Transmitter. The HDTV should now be connected to the Receiver.

7. Tap on the HDTV near the Receiver. Make sure you have selected the correct source. You should be able to see video from the source device.
Troubleshooting

FREQUENTLY ASKED QUESTIONS

1. I can’t see my channel or volume with the remote control included with the MyWirelessTV system.
   - The MyWirelessTV remote control is intended for switching multiple input, pointing configuration, and software updates. It is not a universal remote control.
2. I do not see any video when I connect my PC/ laptop to the MyWirelessTV. 
   - Make sure the HDMI output display is selected from your PC/Laptop. Refer to your PC/Laptop’s user manual.
3. The video quality is poor.
   - You may need to adjust the orientation of the Transmitter/Receiver during setup. This can help ensure the wireless signals between the two devices. You may need to adjust the Transmitter’s and Receiver’s boxes to be pointing more directly at each other. To learn more, see the “MyWirelessTV” user manual.

6. Removing the protective covering of the display screen and attach the flat end of the IR Blaster cable to the MyWirelessTV remote control of the HDTV bundle or frame.

8. Plug the Blaster cable’s black connector into your TV’s remote sensor of the source device.

9. Place the flat end of the IR Blaster cable in front of (not directly over) your remote sensor of the source device.

7. Plug the IR Blaster cable’s green connector into the green port on the back of the Receiver.

CAUTION

W/ tattoo on losses and control batteries are replaced by an incorrect type or disposed of hazardous materials according to the instructions.
