

## Wireless Network Extender with Powerline and Ethernet

Model # PWR51W

### Extend Your Existing WiFi Network

With the PWR51W, you can provide reliable whole-home wireless coverage to your subscribers. The HomePlug or Ethernet-based adapter extends a homeowner's Wi-Fi network to an area of the home where wireless coverage was previously weak, such as a dead zone in the 2nd floor bedroom or 1st floor family room. Using a wired Ethernet or Powerline connection, the PWR51W offers the easiest solution around for extending the home's Wi-Fi network. This means your customers can make the most of their broadband experience, and won't report any problems when streaming a video to their tablet or setting up a gaming console in whatever room they choose.

### Key Features

- ? WiFi 802.11n 2x2 MiMo
- ? Autosync with Existing Router
- ? Connect to a Router using the Home's Existing Powerlines (HomePlug)
- ? 2 Ethernet Ports on Bottom
