

MegaPlug™ AV 200 Mbps 4-Port Switch

Rewire Your House Without Rewiring

The MegaPlug AV 4-Port Switch turns any electrical outlet in the home into a high-speed Internet connection, with speeds up to 200 Mbps. Powerline technology networks the home without having to rewire or struggle with spotty or unreliable wireless connections.

Four Ports on One Unit

Connecting the 4-Port Switch to your home theater allows you to bring high speed Internet access to your TiVo®, satellite receiver, Blu-Ray Disc™ player, gaming console, television, or other DVR device. This allows you to enjoy the many online applications available, such as on-demand programming, software updates, and HD video streaming.

Plug It In, Turn It On, Connect

Installation takes only seconds. Simply plug the 4-Port Switch into an electrical outlet where a network connection is needed. Connect the Switch to up to four Ethernet-ready devices. Then, connect an Actiontec MegaPlug AV Adapter to an outlet near the broadband router, and connect that Adapter to the router. That's it – no software or configuration is required.

Top Secret-Grade Security

The MegaPlug AV 4-Port Switch features 128-bit AES, which is a new type of security and the first available to the general public approved by the U.S. government for classified, top-secret documents. AES security is so secure, no computer existing today can break its code.

Change Security Key With a Push of a Button

Additional security can be achieved easily on the 4-Port Switch. Pressing the button changes the security key and gives you a two-minute window to change other powerline adapters. When you're done, you've got a new matched security key protecting your network.

Ideal for High Bandwidth Applications

The MegaPlug AV 4-Port Switch supports the latest HomePlug AV standard that more than doubles the rates of previous generation HomePlug solutions. As a result, the Switch is ideal for high-performance "triple play" multimedia services like voice, HD video streaming, and console gaming.

Energy Efficient

Without compromising on performance, the MegaPlug AV 4-Port switch saves up to 60% energy for the user by switching to energy saving mode when there is no traffic going through.

Other Features

Interfaces

- Four 10/100 BaseT Ethernet LAN

Supported Home Theater Devices

- Anything with an Ethernet Port including
 - TiVo
 - Wii
 - Slingbox
 - Apple TV
 - Xbox 360
 - VUDU Box
 - Playstation 3
 - Ethernet-enabled Blu-ray Player

Supported Modems, Routers & Gateways

- Any modem, router or gateway with an Ethernet port

Data Transfer Rates

- up to 200 Mbps over Powerline
- up to 100 Mbps over Ethernet

Powerline Standards

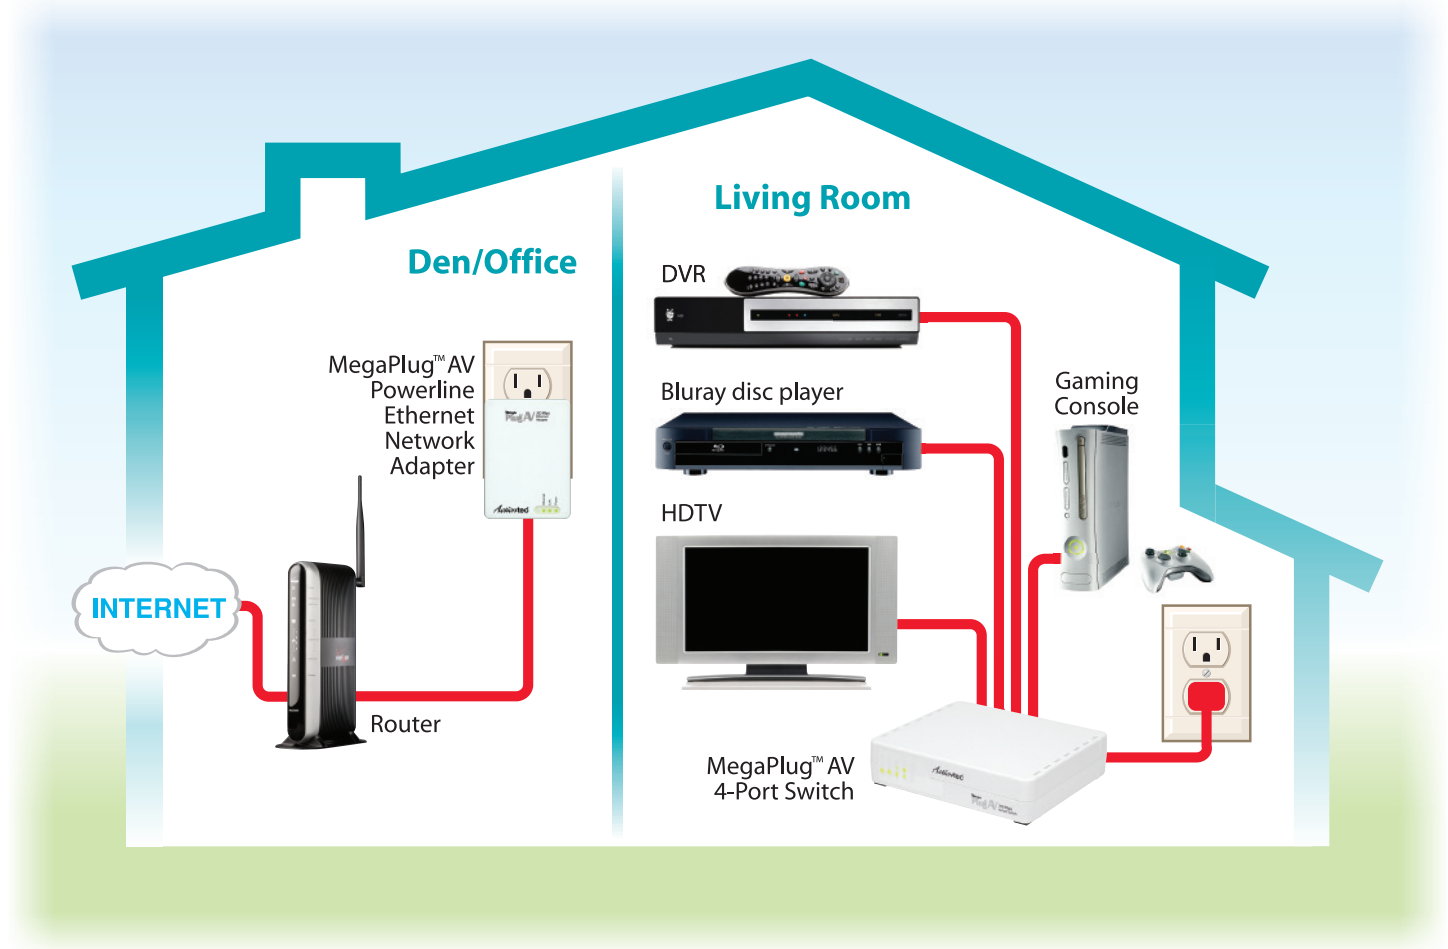

- HomePlug AV compliant

Typical Coverage

- Up to a 5000 square foot home

MegaPlugAV 200 Mbps 4-Port Switch

Typical Usage

Corporate Office

760 N. Mary Avenue, Sunnyvale, CA 94085
