MyWirelessTV allows video and audio to be sent from video source to the TV wirelessly. Therefore, you have the freedom to place the TV virtually anywhere within the home and enjoy live TV without the wiring mess.

Make sure you identify which ‘source device’ that you want to connect to the Transmitter. Video from that ‘source device’ will be transmitted to your receiver box(s).

### Installation

Installation of MyWirelessTV is **EASY**. Both units come pre-paired to work with each other. All you need to do is connect the cables according to the diagram or, if you want, follow the detailed step-by-step instructions.

### How MyWirelessTV Works

**Step 1**

- **Optional** If the source device is previously connected to an HDTV, unplug the HDMI cable from the back of the source, then plug the free end of the HDMI cable into the HDMI port that labels *Out-to-TV* on the back of the Transmitter.

**Step 2**

- **Step 2a** Get the power supply from MyWirelessTV 2 Kit. Plug the smaller end of the power supply into the 5VDC port on the back of the Transmitter.
- **Step 2b** Plug the larger end of the power supply into a power outlet.
- **Step 2c** Verify the Power Light on the Transmitter is SOLID Green.
- **Step 2d** Now power on your video Source Device.

**Step 3**

- **Step 3a** Get the Wireless HD Video Receiver, HDMI cable and power supply. Go to the TV that you want to connect.
- **Step 3b** Plug one end of this HDMI cable into an HDMI port on the HDTV.
- **Step 3c** Plug the other end of the HDMI cable into the HDMI port labels *Out to TV* on the back of the Receiver.
- **Step 3d** Turn on the TV and switch the source to the HDMI input that the Receiver is connected to.

**Step 4**

- **Step 4a** Plug the smaller end of the power supply into the 5VDC port on the back of the Receiver.
- **Step 4b** Plug the larger end of the power supply into a power outlet.
- **Step 4c** Make sure the Power Light on the Receiver is SOLID Green.
- **Step 4d** Wait for a bit as the Receiver connects to the Transmitter. The LINK light should show SOLID Green once they’re connected.

**Step 1**

- **Optional** If the source device is previously connected to an HDTV, unplug the HDMI cable from the back of the source, then plug the free end of the HDMI cable into the HDMI port that labels *Out-to-Tv* on the back of the Transmitter.

**Step 2**

- **Step 2a** Get the power supply from MyWirelessTV 2 Kit. Plug the smaller end of the power supply into the 5VDC port on the back of the Transmitter.

**Step 3**

- **Step 3a** Get the Wireless HD Video Receiver, HDMI cable and power supply. Go to the TV that you want to connect.
- **Step 3b** Plug one end of this HDMI cable into an HDMI port on the HDTV.
- **Step 3c** Plug the other end of the HDMI cable into the HDMI port labels *Out to TV* on the back of the Receiver.

**Step 4**

- **Step 4a** Plug the smaller end of the power supply into the 5VDC port on the back of the Receiver.

### Note:

- Only use power adapter, Actiontec Electronics Inc., Model # WA-10P05FU
- The LINK light will blink.
- Up to **150 ft.** range* (subject to change. Walls, ceilings and floors may reduce the wireless range.)

**Note:** Digital images depict MyWirelessTV's 2nd Generation Transmitter and Receiver. Please refer to this illustration while connecting cables.
How MyWirelessTV Works

Check the power and connection from the video source to the Receiver. If you see a loss of signal from the source device, re-check the power and connection from the Transmitter over the air.

You may need to adjust the orientation of the Transmitter and Receiver to ensure a strong signal is consistently received. Adjust the Transmitter or Receiver until you see a steady video display on the Receiver’s TV.

The MEN U button provides access to the Menu screen. This is the screen where you can change the language for display and video stream mode. To access the Menu page, press the MEN U button once on the Receiver.

Note: The Receiver and Transmitter are in the same room.

Troubleshooting

Frequently Asked Questions

Do I need to connect a TV to the Transmitter’s HDMI Out to TV port?

Yes. This is optional.

I’m not seeing video on the TV that’s connected to the Transmitter. Why?

The video quality is poor and sometimes there’s no video display on the Receiver’s TV.

You may need to adjust the orientation of the Transmitter and Receiver units, and direct them to be facing each other. You can view the MyWirelessTV connection strength on the Menu page of the Receiver. To access the Menu page, press the MEN U button once on the Recei ver.

I cannot control the source device with its remote control. Use of this cable is optional.

Determine control of the source device. This step is optional.

What is the MEN U button on the Receiver?

The MEN U button provides access to the Menu screen. You can view the device firmware version, signal strength, change the language for display and video stream mode.

The audio and video on the Receiver’s TV appears slower than on Transmitter to TV.

This is expected since the Receiver receives audio originating from the Transmitter over the air.

Setting Up IR Control (Optional)

Get the IR Blaster cable

If the Receiver and Transmitter are in the same room, the connection from the Transmitter to TV is not required.

Do I need to connect a TV to the Transmitter’s HDMI Out to TV port?

Yes. This is optional.
