## A Install the First Adapter

**Note:** See the figure on the back of this guide for more details.

**Step 1** Get one **MoCA Network Adapter**.

**Step 2** Plug one end of an **Ethernet Cable** into the **Ethernet Port** on the side of the **Adapter**.

**Step 3** Locate your broadband modem/router. Plug the other end of the **Ethernet Cable** into an open **Ethernet Port** on the back of the **Modem/Router**.

**Step 4** Locate the coaxial cable connected to the wall outlet in the room with the modem/router. Connect the free end of the **Coaxial Cable** to the **Coax In Port** on the side of the **Adapter**.

**If another device is using the coaxial wall port from step 4:**

- A. Disconnect the coaxial cable from the wall port.
- B. Connect a coaxial cable between the wall port and the single port on a 2-way splitter (not provided).
- C. Connect the coaxial cable removed in step A to one of the dual ports on the 2-way splitter.
- D. Connect a coaxial cable between the Adapter and the other dual port of the 2-way splitter.

**Step 5** Get the Adapter's power adapter. Plug the appropriate end of the **Power Adapter** (External, 5V DC, 2A made by APD, Model #WA-10P05FU) into the **Power Port** on the side of the **Adapter**, and plug the other end into a **Power Outlet**.

## B Install Additional Adapter(s)

If necessary, additional Adapters can be placed in locations around the home/office that need an Ethernet Internet connection, and are near a coaxial port.

To install, follow the instructions in the first section of this quick start guide, "Install the First Adapter," except for step 3. Use the following step 3 instead:

**Step 3** Locate the device to connect to the Internet. Plug the other end of the **Ethernet Cable** into an open **Ethernet Port** on the back of the **Device**.

Continue with steps 4 and 5 to complete the installation. Repeat for additional Adapters.

Congratulations! You've successfully connected your device to the Internet. For registration or access to user manuals, wall-mount templates, software updates, etc., go to; <http://www.actiontec.com/338.html>
